

A. 2–40m

Lower AIC = better fit | Points = best-fitting scale per stratum

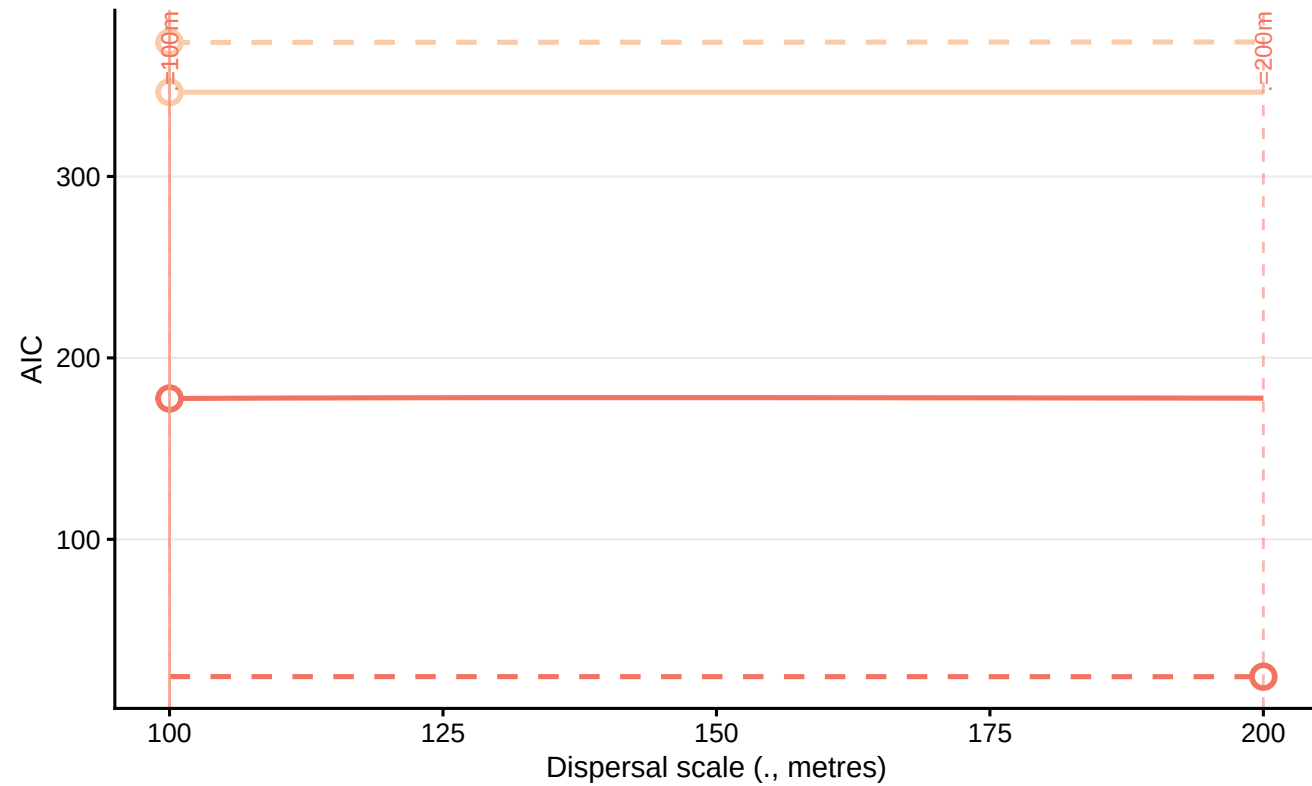

B. 40–100m

Lower AIC = better fit | Points = best-fitting scale per stratum

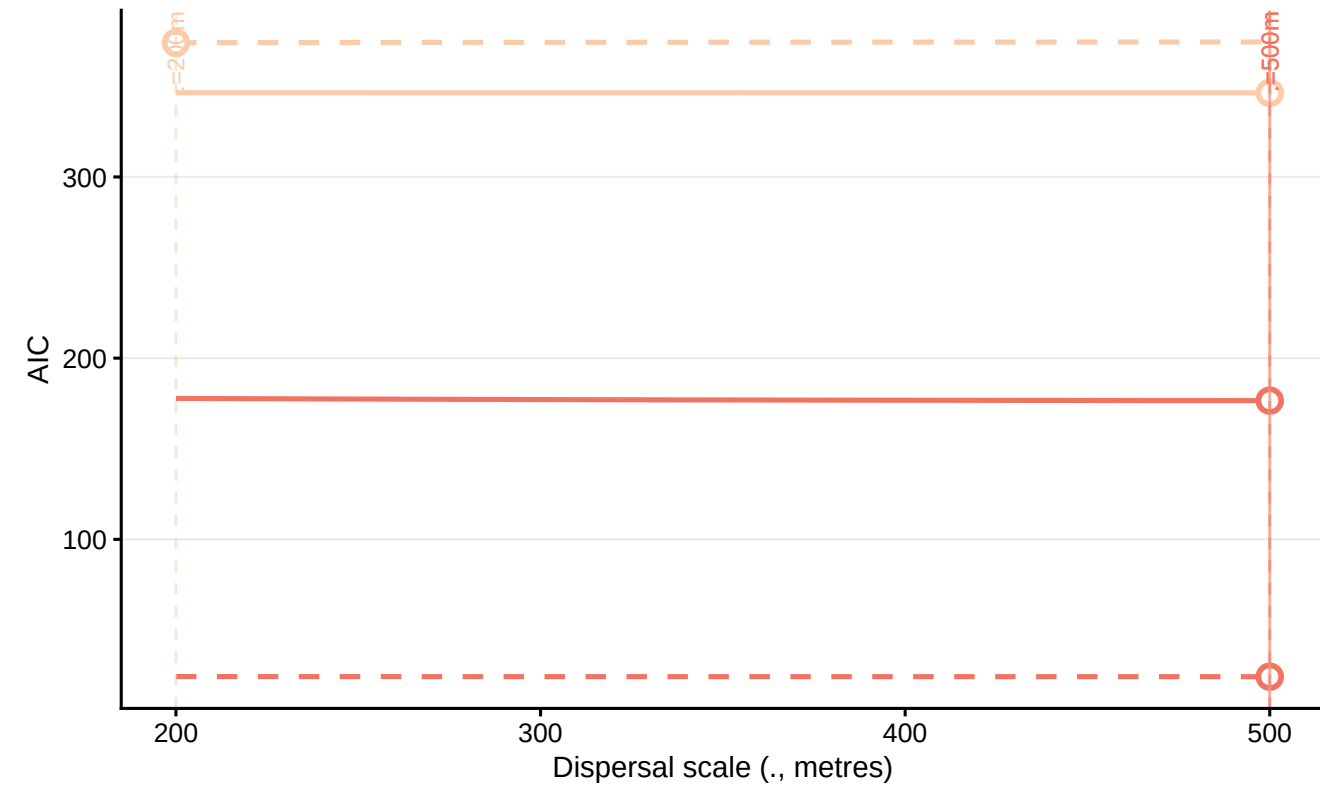

C. 100–200m

Lower AIC = better fit | Points = best-fitting scale per stratum

D. 200–500m

Lower AIC = better fit | Points = best-fitting scale per stratum
